Dr. Gray

Boston, Aug. 10. 1846

Dr Sir

I send you my check for the $12.31 cost of Annals N.Y. Lyceum for Dr. Engelmann & I also return you Mr Carey's letter about the Orchidaceae. The plants are in poor order, but we will do the best we can for them —

Boott is buying me a good many books & expresses a wish that you should know what he has sent me & advise him in any way as to future orders — I add a list on the next page — He desires me to thank you for the Carex you sent to him — which he finds poor Prescott had called C. fraterna — He has a good figure of it drawn by P's directions & he finds it among the Arctic plants from Richardson &c. He says your C. hystrix is his C. sicaeformis & Shuttleworth's C. crus-corvi figured poorly by Kunze —

Yrs
Yrs truly
